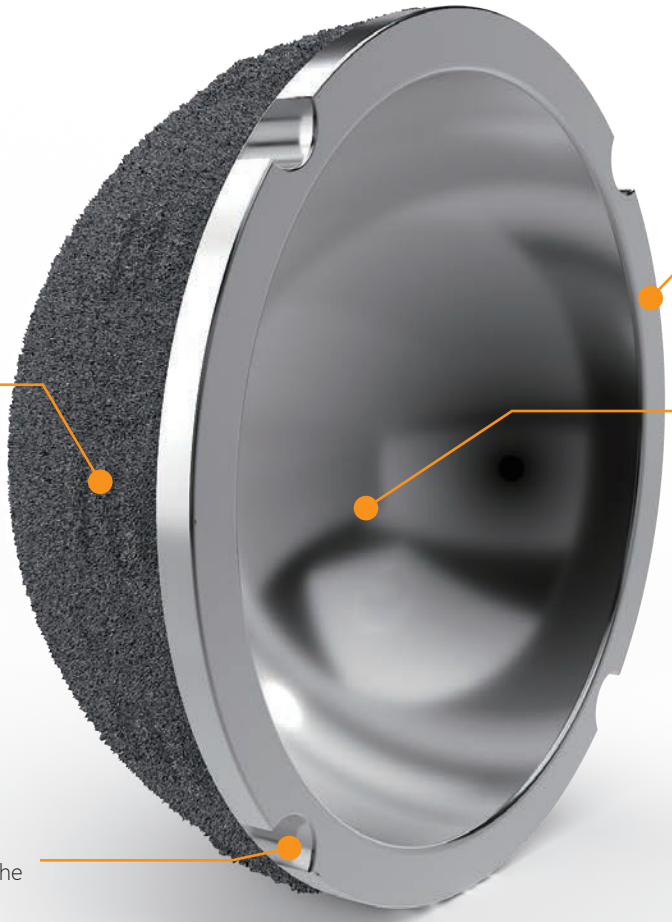
58	52	28
60	54	28
62	56	28
64	58	28
66	60	28



Dual Moblity Bearing Options: Highly crosslinked polyethylene (HXL) or Vitamin-E highly crosslinked polyethylene (VE HXL) articulates with CoCrMo or Ceramic femoral heads. Large ROM and low wear rate.

- **Dual mobility increase range of motion**
- **Titanium plasma spray**
- **Highly polished inner surface lower wear rate**
- **Reduced dislocation risk**

DMH CoCr Liner

Compatible with VarioCup, TPS Coating; VarioCup, Pressfit; and OSSEOMATRIX Cup

Optional Screws, screw plugs and dome plug

Dual Moblity Bearing Options: Highly crosslinked polyethylene or Vitamin-E highly crosslinked polyethylene articulates with CoCrMo or Ceramic femoral heads. Large ROM and low wear rate.

- **Dual mobility increase range of motion**
- **compatible with various aetabular cups which provides option of using screws**
- **highly polished inner surface lower wear rate**
- **Flexibility of selecting conventional hip or dual mobility hip in a surgery**
- **Reduced dislocation risk**
